

The Science of the Soul

Thought - provoking workshops with the goal to help you understand yourself to a degree you never imagined possible.

Whether you are an M.D., neuroscientist, member of the clergy, spiritual seeker or devout skeptic; these will be the most profound, life-changing workshops you will ever attend.

What Lee presents, and demonstrates, with the help of random volunteers, are “universal truths” applicable to all spiritual paths and professions dealing with healing, whether from a physical or psychological perspective.

Combining his intuitive gifts and knowledge from studying religion, psychology and neuroscience, Lee will guide you to an incredible awareness of your soul and its dynamic connection to your body.

Some of the topics covered:

- The causes of many medical problems and why they manifest where they do in the body;
- See how foundational soul experiences affect who we are and reveal how consciousness is a physical and tangible field connected to our bodies;
- How and where memories are stored, retrieved and processed;
- The spiritual development cycle of the human soul;
- How faith healing works; the effects on the soul of prayer, yoga, meditation ... & much, much, more!

Lee Lawrence

Lee is an experienced and enthusiastic presenter whose education and research into religion, psychology, and neuroscience brings these fields together in one unified body of knowledge. His scientific research into the existence of the human soul and how it works takes science beyond its current limits. He takes on the conventional theories of research scientists in neuroscience and demonstrates, with profound proof, why his explanations hold scientific merit. Understanding what he teaches will lead to a profound paradigm shift in the unification of scientific, psychological and religious theory. His understanding of the interaction between the human soul or spirit and the physical body opens new doors for the future of both psychological and physical medical diagnosis and treatment.

Bridging the gap between science and spirituality:
